Rating: ★★★★★

**BEST BUY** THIS rack's unique ratchet strap arrangement means bikes can be held differing widths apart, making the unit completely customisable. Better still, tightening the strap locks the supports in place and holds the bikes' crossbars so firmly that there's no need for extra strapping, or wheel supports, to prevent the bikes clashing against each other. So loading and unloading is unbeatably fast and easy. As you'd expect from our Best Buy, the rack tilts for easy boot access, all bikes can be locked to the rack and the rack itself is compact to store. It's easily fitted and removed from your tow bar, too.
